PROFESSIONAL SUMMARY

CompTIA Security+ certified IT professional with hands-on experience supporting enterprise Windows environments, Active Directory, virtualization, and identity management. Experienced troubleshooting hardware, software, and network issues while supporting 500+ users in secure enterprise environments. Passionate about delivering reliable technical support and continually expanding technical skills.

TECHNICAL SKILLS

Systems & Administration: Active Directory, DNS, DHCP, Group Policy, MECM

Operating Systems: Windows Server, Windows, RHEL

Security & Networking: Nessus, Tenable.sc, CrowdStrike, DISA STIG, Duo MFA

IT Support Tools: Remedy, ConnectWise, SharePoint

Virtualization & Platforms: VMware, Microsoft Entra ID

Programming: Python, Java, C++

PROFESSIONAL EXPERIENCE

IT Systems Administrator

MSL | Orlando, FL

Nov 2023 - Feb 2024

- Served as the sole Systems Administrator supporting enterprise users worldwide, resolving hardware, software, account, and network issues while maintaining compliance with enterprise security standards.
- Managed server replication across three enterprise sites, improving redundancy and overall system availability.
- Provisioned, modified, and disabled user accounts, reset passwords, managed permissions, and configured multi-factor authentication using Microsoft Entra ID, Duo MFA, and FortiToken.
- Monitored network and endpoint security using FortiGate and CrowdStrike while troubleshooting connectivity issues and assisting with threat detection and incident response.

Systems Administrator Lead

United States Marine Corps | Miramar, CA

Nov 2019 - Oct 2023

- Led a team of four administrators supporting more than 500 users in a Network Operations Center (NOC), overseeing ticket resolution, user support, account management, and enterprise system availability.
- Administered Active Directory domains, domain controllers, Microsoft Exchange, PKI infrastructure, and enterprise user accounts while resolving authentication and access issues.
- Managed over 20 VMware virtual machines running Windows Server and RHEL Linux while performing server maintenance, troubleshooting, and performance optimization.
- Applied DISA STIG security hardening standards to enterprise Windows and Linux systems to ensure compliance and reduce security risk.

Data Systems Supervisor / Cyber Network Operator

United States Marine Corps | California

Mar 2017 - Nov 2019

- Provided Tier 1 and Tier 2 IT support for more than 900 users, troubleshooting Windows workstations, hardware, software, account access, printers, and network connectivity issues across multiple locations.
- Assisted with deployment and maintenance of enterprise network infrastructure across multiple locations, ensuring reliable connectivity and minimal downtime.
- Resolved user issues through the Remedy ticketing system, including password resets, account provisioning, software installation, hardware replacement, printer support, and remote troubleshooting while meeting service expectations.

PROJECTS

Enterprise Active Directory Home Lab

May 2026 - Present

- Built and maintained a virtual enterprise environment using VMware Workstation.
- Configured a Windows Server Domain Controller with Active Directory Domain Services (AD DS).
- Created and managed Organizational Units (OUs), users, groups, and Group Policy Objects (GPOs).
- Configured DNS and DHCP services for domain management.
- Joined Windows client machines to the Active Directory domain.
- Practiced user account provisioning, password resets, permissions management, and domain administration.
- Simulated enterprise IT administration and troubleshooting in a lab environment.

EDUCATION

Bachelor of Science in Computer Science

Southern New Hampshire University

Graduated: Apr 2026
